20. A recombinant West Nile virus envelope protein vaccine candidate produced in Spodoptera frugiperda expresseSF+ cells

Development of a novel recombinant influenza vaccine in insect cells

21. Safety and immunogenicity of a baculovirus-expressed hemagglutinin influenza vaccine: a randomized controlled trial

JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION 297(14); (2007) 1577-1582

22. Dose-Related Safety and Immunogenicity of a Trivalent Baculovirus-Expressed Influenza-Virus Hemagglutinin Vaccine in Elderly Adults

THE JOURNAL OF INFECTION DISEASES 193(9); (2006) 1223–1228

23. A recombinant baculovirus-expressed S glycoprotein vaccine elicits high titers of SARS-associated coronavirus (SARS-CoV) neutralizing antibodies in mice

24. Expression and purification of an influenza hemagglutinin – one step closer to a recombinant protein-based influenza vaccine

BIOPROCESSING JOURNAL 4(1); (2005) 27–29
Improved Purification of p55 Protein from Secreted Virus-Like Particles from Baculovirus-Infected Insect Cells by Using an Alternative Selective Precipitation Method

25. Skewed representation of functionally distinct populations of virus-specific CD4 T cells in HIV-1 infected subjects with progressive disease: changes after antiretroviral therapy

26. Phenotypic heterogeneity of antigen-specific CD4 T cells under different conditions of antigen persistence and antigen load

Thrombospondin-1 plus irinotecan: a novel antiangiogenic-chemotherapeutic combination that inhibits the growth of advanced human colon tumor xenographs in mice

PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE UNITED STATES OF AMERICA 101(9); (2004) 3166–3171
Pathogenicity and immunogenicity of influenza viruses with genes from the 1918 pandemic virus
